

SVHC Compliance Statement

REACH, a European Union regulation on chemicals and their safe use, was adopted as a formal regulation in the European Union on June 1, 2007. The legislation addresses the Registration, Evaluation, Authorization and restriction of Chemical substances, and creates many obligations on manufacturers and importers of chemical substances into Europe. REACH makes manufacturers and importers of chemical substances responsible for assessing and managing the risks posed by these chemicals, registering those chemicals, and providing the appropriate safety information to their end users.

One obligation was to identify all relevant, currently known substances of very high concern (SVHC's) and start eliminating their use. SVHCs are chemicals that are carcinogenic, mutagenic or toxic to reproduction (CMRs), persistent, bioaccumulative and toxic or very persistent and very bioaccumulative (PBTs/vPvBs) and chemicals that pose an equivalent level of concern like endocrine disruptors (EDs) and sensitizers.

Bomar Specialties products do not contain substances on the REACH SVHC candidate list in concentrations greater than 0.1% by weight, most recently updated as of June 14, 2023 (<https://echa.europa.eu/de/candidate-list-table>).

Bomar Specialties products do not contain any of the Annex XVII REACH Restricted Substances as updated by ECHA on January 5, 2023 (<https://echa.europa.eu/substances-restricted-under-reach>) nor substances which are on the latest Authorization List (<https://echa.europa.eu/de/authorisation-list>) above the reportable threshold value.

More details about REACH can be found in the following link: http://ec.europa.eu/environment/chemicals/reach/reach_intro.htm
